

The 18th Science Council of Asia Conference

"Role of Science for Society: Strategies towards SDGs in Asia"

Tokyo, Japan

5th - 7th December 2018

Organised by:

Science Council of Japan (SCJ)

FIRST ANNOUNCEMENT and CALL FOR PAPERS

Conference Description:

“Transforming our world: the 2030 Agenda for Sustainable Development” was unanimously adopted at the UN General Assembly in 2015. Under a common principle of no one left behind out of 7 billion people living in the world, this Agenda has 17 goals (Sustainable Development Goals, SDGs) and its 169 targets to be achieved within 15 years from 2016.

In response to this, the 18th Science Council of Asia Conference in Tokyo will focus on Asian region specific issues and widely discuss such as what are the issues to be taken into account, how they are being treated and what are the directions to be proceeded, and we will have them in common to deal with in the future as Asia.

Sustainable Development Goals (SDGs)

SDGs means Sustainable Development Goals, which are shown as a collection of 17goals set by the United Nations.

Organising institutions:

The Science Council of Asia (SCA) is an international scientific organisation founded in 2000 by Asian science academies and other national scientific organisations. SCA aims to provide scientists in all fields, including cultural and social as well as natural sciences and technology, with a collaborative platform for promoting scientific exchange and cooperation in Asia, and to develop and promote a holistic vision focusing on sustainable development and improvement in quality of life. At present, SCA is comprised of 31 academic organisations in Asia, and SCA Conference has been held annually since 2001.

Science Council of Japan (SCJ) is the representative organisation of Japanese scientist community ranging over all fields of sciences subsuming humanities, social sciences, life sciences, natural sciences, and engineering. SCJ was established in January 1949 as a "special organisation" under the jurisdiction of the Prime Minister of Japan, operating independently of the government, for the purpose of promoting and enhancing the field of science, and having science reflected in and permeated into administration, industries and people's lives. It represents Japan's scientists both domestically and internationally with the firm belief that science is the foundation upon which a civilised nation is built.
